

# Process Drainage Trench

## *SOLUTION*

SERVICE SYSTEMS SOLUTIONS

## Concrete Repair & High Performance Lining

### Our Customer's Challenge

Severely deteriorated concrete and corroded steel frame, previous concrete patches were not effective in the acidic environment.

### PREPARATION & PRODUCT:

- Abrasion Blast
- Diamond Grinding
- Back build with chemical resistant Epoxy mortar
- Multiple coats of a chemical resistant high performance Novolac coating

### CPE's Solutions

CPE's Coatings & Linings field service crew specializes in the rehabilitation of structural and process materials exposed to the harshest conditions.

With our 2 stage preparation and high performance epoxy based mortar and coating, CPE not only can restore concrete surfaces but improve their resistance to aggressive chemicals and minerals
